DAV college / Lalitpur / October
 2018 – present

Achievements

Hackathon - Code for change

We participated in this hackthon where we compete against 10 colleges where we make the website in limited time.

Projects

Food ordering application using futter and firebase

This is my college project I have build UI and I code some business logic for my college project. I have used firebase for my backend.

https://github.com/IshworMoktan/Foodora-app

Mitra social site

This is my 4th semester project. I made it using html, CSS and JavaScript for frontend and I used php for the backend. I have used MySQL for database. I handled the backend part where I coded crud operations and database connectivity.
